Brass instrument | music | Britannica A brass instrument is a musical instrument that produces sound by sympathetic vibration of air in a tubular resonator in sympathy with the vibration of the player's lips. Brass instruments are also called labrosones or labrophones, from Latin and Greek elements meaning 'lip' and 'sound'. There are several factors involved in producing different pitches on a brass instrument.

Brass instrument - Wikipedia The flugelhorn (/flʊɡəlˈhɔrn/) is a brass instrument that resembles the trumpet and cornet but has a wider, more conical bore. Like trumpets and cornets, most flugelhorns are pitched in B♭ (some are in C). It is a type of tubular instrument, developed in Germany in the early 19th century from a traditional English cornet.

Flugelhorn - Wikipedia The French horn (since the 1930s known simply as the "horn" in professional music circles) is a brass instrument made of tubing wrapped into a coil with a flared bell. The double horn in F/B♭ (technically a variety of German horn) is the horn most often used by players in professional orchestras and bands. A musician who plays a horn is known as a horn player or hornist.

French horn - Wikipedia The French horn family has been used for centuries in the military, for hunting, and in orchestras. Brass players vibrate their lips into a mouthpiece attached to the instrument. The smallest in size and the highest pitched of the brass family is the trumpet, with its cylindrically bore and valves.
